

Windows and blinds controls

In suites with inner blinds, blinds and windows controls are activated by tapping the display or home icon.

By dragging finger over the big windows and blinds icons, you can select controls for windows and blinds.

By dragging finger over the bottom control bar, you can open or close certain window or blind continuously.

By clicking the icon in bottom left corner, you will close the window or blind entirely.

By clicking the icon in bottom right corner, you will open the window or blind entirely.

By selecting the big icon „Všechny rolety (all the blinds)” and using the corner icons, you control all the blinds at once.
